

**The LLAGNY Education Committee is pleased to present
the following webinar:**

Patent Law Research: An Introduction

Monday, September 26, 2016 12:00-1:00pm

Presented by

Robert Poolman and Guillaume van Rijckevorsel. Robert is a senior manager for innovation and consulting at Minesoft. Ltd. Minesoft develops international searchable databases and web-based products for Intellectual Property (IP) research and specializes in patent information, IP document retrieval, patent analytics, patent archiving and competitive intelligence systems. Our flagship product, PatBase is a **leading global, searchable online patent database** covering over 57 million patent families (containing 109 million patent publications) from over 104 issuing authorities.

Guillaume is partner at Darts-IP and runs the US operations. Darts-ip is the **world's only** global IP case law platform. Darts-ip covers more than 3000 courts globally and has assembled and analyzed over 2,000,000 IP cases (Patent, Trademark, Design & Model, and Domain Name) worldwide covering US, China, Europe, Brazil and Commonwealth countries, Mexico, Japan, and South Korea.

Join us as we highlight some of the basics of patent law research and show how Darts-IP and Minesoft can help the patent law researcher. PatBase offers users a robust platform from which to search, review, share and analyze business-critical patent information. With over 60 searchable fields, PatBase is a tried and trusted primary search tool used by top corporations and law firms worldwide. More information available at www.minesoft.com. Darts-ip allows you to searching for cases around the globe on specific patent, patent portfolio, company, drug name, legal topic and much more thanks to its search interface designed by IP professionals. More information available at <http://www.darts-ip.com>.
